

PROLAST COVERS™

Protect your investment with ProLast™ Covers

Performance

50% denser insulating foam (compared to equivalent vinyl covers) improves energy efficiency and supports heavier loads such as rain and snow.

UV, water, and stain resistant ProLast™ marine grade fabric means your cover last longer and maintains it's box fresh look for longer.

Double stitched and 40-point reinforced for extra strength, reducing risk of tears, and improving cover lifespan.

4-2.25-inch taper to promote run-off, reduce risk of pooling, and water ingress.

Vapour lock seal is four times more effective in inhibiting moisture absorption than ordinary seals.

Heat seal material on the cover under side retains heat and moisture, regardless of the outside temperature.

Scientifically formulated plastic that's for more resistant to water vapour transmission than ordinary plastic.
